

## CS3

### 6" Compact Dye-Sub Photo Printer

Sinfonia is recognized for its outstanding durability and superior print quality, and the CS3 photo printer continues that legacy. As the only Japan-made dye-sublimation photo printer in its class, the CS3 delivers excellent print quality, durability, and fast performance in an incredibly small footprint. Weighing less than 20 lbs (9 kg), it features one of the world's lightest and most compact designs, making it easy to transport and ideal for photo booths, kiosks, events, and amusement parks. It can also be used with Passport Systems.

Despite its compact size, the CS3 offers increased paper capacity compared to the previous CS2 model, supporting up to 400 prints per media load for longer operation between changes. With print speeds of just 13 seconds for a 4x6, it keeps pace with high-demand environments.
